j. The horsepower of the car with the highest mpg: 65

Task 3

#Stack Overflow (https://stackoverflow.com) is an active community where Python and data science are frequently discussed. Users post questions related to all aspects of Python, including troubleshooting code, understanding algorithms, and choosing the right libraries for data science tasks. The community is highly active, with questions often being answered within minutes. Users range from beginners to experts in Python and data science, and the community is generally friendly, although detailed, well-researched questions are more likely to receive positive responses. It's a helpful space for newcomers, provided they follow community guidelines and clearly explain their problems.
